

DotNetNuke Features:

Version: 4.8.4

- Content Management system
- Support custom skins
- Supports multi-language localization feature which allows administrators to easily translate their projects and portals into any language
- Easy to Setup in local system
- Simple web hosting
- Support multiple websites from a single application installation
- Allows administrators to manage an unlimited number of websites – each with its own unique appearance and content.
- One of the features and performance enhancements added to DotNetNuke 4.8.4 was the enhanced Delete Portal functionality.

DotNetNuke Disadvantages:

- DotNetNuke only providing roles May be problem of security
- Database is huge
