

1. Defaul Home Page

The screenshot shows the Kellstrom web portal home page. At the top left is a logo with a sunburst and the word "DANDYLION". Below it is a navigation bar with "KELLSTROM", "MEMBER LOGIN", and "REGISTER". A breadcrumb trail reads "You are here : kellstrom > Portal". The main content area features a search bar with a "Go!" button, a "DNN Creative" link, and a "Dotnet Nuke" link. A central text block explains the benefits of web portals, accompanied by a "CANADINE BATE" logo. To the right is a login form with fields for "User Name:" and "Password:", a "Login" button, and checkboxes for "Remember Login", "Register", and "Forgot Password?". Below the login form are statistics for "Membership" (Latest: Sahoo, New Today: 1, New Yesterday: 0, Overall: 3), "People Online" (Visitors: 0, Members: 0, Total: 0), and "Online Now:". The footer includes "Copyright Of Kellstrom ©2008 All Rights Reserved" and a taskbar showing "Local intranet" and "100%".

Web portals provide a single point of access to a variety of content and core services, and ideally offer a single sign-on point. Portals give you a managed online experience, and can be particularly helpful as a start and return point for those new to the web. Portal content is dynamically managed through [databases](#), application windows, and sometimes [cookies](#). Portals often include calendars and to-do lists, discussion groups, announcements and reports, searches, email and address books, and access to news, weather, maps, and shopping, as well as bookmarks. Web portals often organize information into channels, customizable page containers where specific information or an application appears. Channels make it easy to locate information of interest by categorizing content.

Web portals offer advantages over home pages because they can offer user-specific, customized views. For example, a university's web portal could offer customized, specific content available to you based on your roles (e.g., faculty, student, staff, administrator). Roles help the portal determine your privileges for reading, searching, updating, adding channels, and personalizing content. The portal uses the information stored in the roles to offer the appropriate content and service choices. You can then create further, more specific content organization by selecting from the personalized material and services, thus making the portal work the way you do.

The [World Wide Web](#) is so large and changes so quickly that no central, comprehensive catalog of its contents is possible. However, many tools exist for searching periodically compiled databases of web sites for particular topics or resources. These tools vary in their scope and accuracy, and you may need to use several search tools before locating the information you want.

The Reference Department of the Indiana University Bloomington Libraries maintains a [Searching the Web](#) page that describes and links to a number of search engines and subject guides.

Also, the Internet Public Library maintains a [Web Searching Tips](#) page that lists search engines and provides tips for searching, as well as descriptions of some of the tools available.

3. Register Page

The screenshot shows a web browser window displaying the registration page of the KellStrom portal. The page features a header with the KellStrom logo and navigation links for 'KELLSTROM', 'MEMBER LOGIN', and 'REGISTER'. A search bar is located on the left, and a breadcrumb trail indicates the current location: 'You are here : Register'. The main content area is titled 'Preferred User Information' and includes a note about public membership. Below this, there are several required input fields: 'User Name', 'First Name', 'Last Name', 'Display Name', 'Email Address', 'Password', and 'Confirm Password'. Each field is marked with a red arrow icon. A 'Register' button is positioned below the password fields. The footer contains links for 'Privacy Statement' and 'Terms Of Use', along with a copyright notice for 2008 by KellStrom. The browser's taskbar at the bottom shows the 'Local intranet' address and a 100% zoom level.
